

Staking Rewards Estimation (Single-Sided Pool)

$\text{stakingReward} = ((\text{lockedUnits} - \text{locks dFrom}) * \text{weightMultiplier}) / 52\text{weeks} + \text{weightMultiplier}) * \text{amount}$

In phase 1, 50% of total supply will be distributed in 52 weeks. For this approximation, it is assumed that in the first 13 period, community members will stake 5% of total supply, and in 40 period additional 5%, and additional 5% in final period
